A microscopic view of ginger cells, showing a network of hexagonal cells with prominent cell walls. Some cells contain large, clear, oval-shaped structures, likely oil droplets or starch granules. The overall color is a warm, golden-brown.

Relivaid's Ginger Extract is
Standardized to Both Gingerol
and Shogaol Actives.

250 mg of our Ginger is the
Weight Equivalent of
62 Grams of Raw Ginger.

Raw Ginger Extract Typically Has
Roughly 2% of Gingerol Bioactives.

The most abundant of
which is 6-gingerol.

A close-up photograph of ginger root bark, showing its characteristic layered, peeling texture in shades of tan and brown. The text is overlaid on the image.

Meet Our Ginger.

Because It's Not Your
Average Ginger.

write down what's on your mind
so you don't carry it to bed

dim the lights
and soften your space

instead of
scrolling tonight...
try this

make a cup of tea
and actually sit down to
drink it

move your body
gently, without pressure

take a few deep breaths
and do nothing for a moment

Ignored

A alta taxa de uma informalidade, o colapso de check-out no meio das vendas, enquanto o mercado acelera a retomada, a longo prazo "normal", não devemos criar o impossível — uma estrutura que nunca pode ser fundada por qualquer um dos estranhos que trabalham por performance. A alta taxa corporativa sobre um pequeno grupo de pessoas não é um problema. É uma estrutura criada para o lucro de todos os que trabalham para ela. Mas não há nada de errado com o que os estranhos que trabalham para ela fazem. Eles não são os responsáveis por sua situação. Eles são os responsáveis por sua situação. Eles são os responsáveis por sua situação. Eles são os responsáveis por sua situação.

**Selling nutra isn't
the challenge.
Scaling it is.**

Zhex supports your operation with stability, even in **high-risk categories**.

The best act of service for your body
is unlocking which personalized
foods + supplements help your
microbiome *flourish*.*

Your microbiome has
a love language.

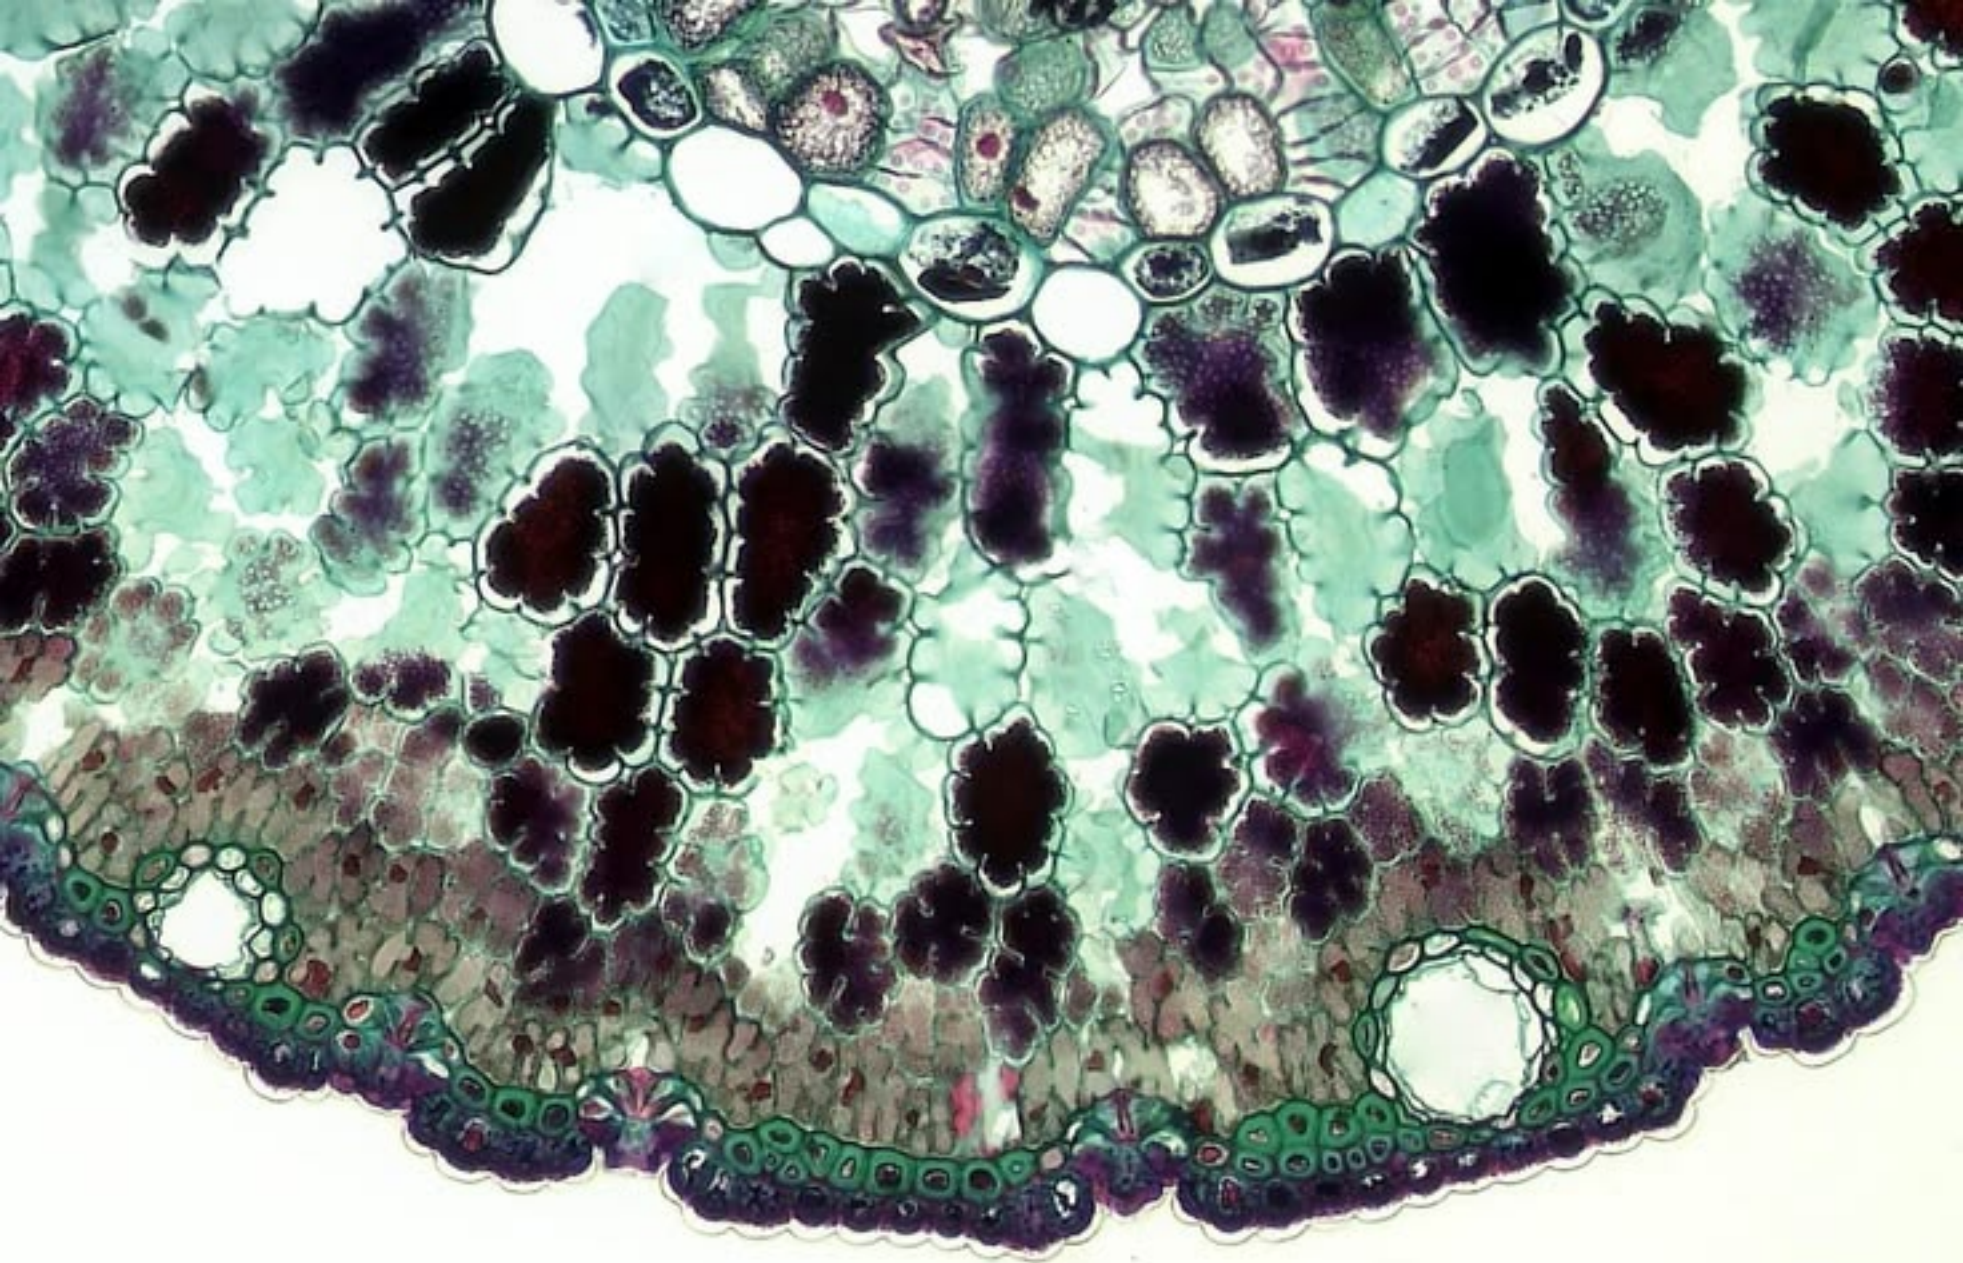

But most people aren't listening...

Activity is key

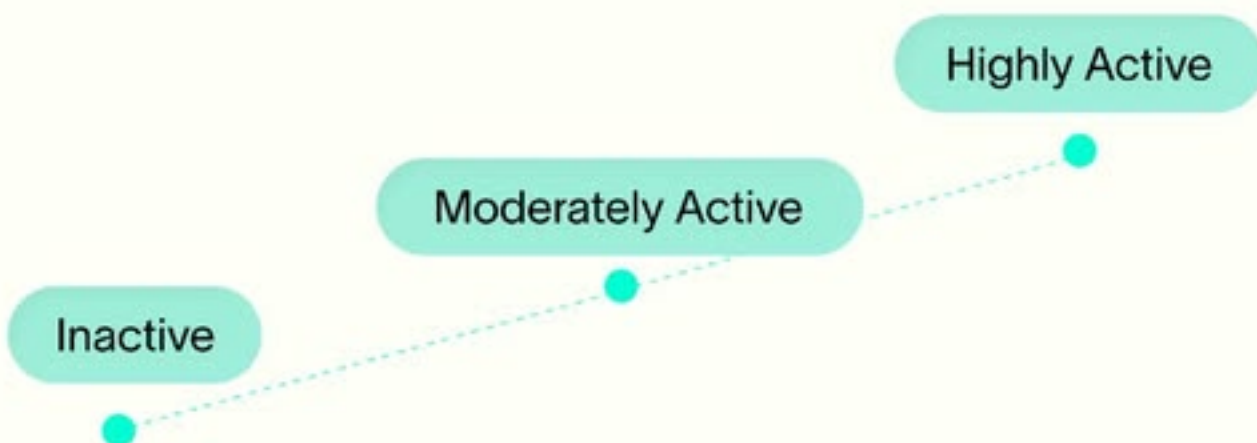

It has a major impact on function...and measuring it tells you what's really going on.

**Guessing leads to generic advice.
Measuring activity leads to clarity.**

The fact is, your microbes can be:

It's their activity, not just their presence,
that affects your health.

**Most gut tests measure the
presence of microbes**

But is that enough?

The background is a composite of microscopic images. It features a large, detailed view of a cell with a prominent nucleus and various organelles, overlaid on a field of smaller, star-shaped microorganisms. Four semi-transparent green rounded rectangular labels are positioned across the image, each containing a small blue dot and a text label.

Did you know?

**Some microbes
specialize in breaking
down *mucus*.**

Mucin-eating microbes get energy from your gut lining when fiber is low, but a balanced diet keeps both you and your microbes healthy.

A close-up photograph of several green, rounded leaves of Centella Asiatica floating in clear water. The leaves have a distinctively lobed or scalloped edge and a prominent central vein with radiating secondary veins. The water surface is slightly rippled, and the background is a soft, out-of-focus white.

Ingredient
Insider

Centella Asiatica

A close-up photograph of a flower petal, likely from a gerbera, showing intricate, wavy, orange-red lines that create a sense of depth and texture. The colors range from bright orange to deep red, with the lines curving and overlapping in a natural, organic pattern.

Crafted by Nature.
